

TISP at EGAMS Chidambaram

A workshop was conducted on engineering principles and what is engineering for teachers and students of class IX & X by Dr. N Kumarappan Professor EEE Dept. AU and Secretary IEEE Madras Section Chennai. In the forenoon session Mr. Kumarappan had an interactive session with teachers & students and in the afternoon session students were guided to make models.

1. Windmill
2. Robot.

The students were ably guided by Vignesh And Arul Raj Research Scholars. Students enjoyed making the models. The arrangements were made by Mr.Raja Office Assisstant, IEEE. I am sure these types of programme will induce scientific temper in students. I wholeheartedly thank Mr.N Kumarappan who was behind this TISP.
